

# Dalla Lana School of Public Health 2010 Summer Workshops

The **Dalla Lana School of Public Health** is pleased to offer a selection of summer workshops to members of the public health and medical community. Starting in May 2010, these workshops will be held primarily in the months of June and July.

These workshops are designed for those with limited exposure to fields of epidemiology and biostatistics, and who are interested in learning new techniques to analyze and present complex health related data. In response to a growing interest in Global Health, one workshop will be dedicated to the “Comparative politics of health policy in a global world.”

For more information regarding these workshops, please visit

<http://www.phs.utoronto.ca/SummerWorkshops2010.asp>

Online registration is available at

<http://www.biostatisticsworkshops.com/event/list>.

Onsite registration on the day of the workshop will also be available.

Survival Analysis

Health Sciences Building, 155 College Street

June 1, 3, & 4, 2010

Mathematical Modeling of Infectious Diseases: A Short, Hands-on Introduction

Health Sciences Building, 155 College Street

June 9, 10, & 11, 2010

A Brief Introduction to the Analysis of Continuous and Binary Response Data

Health Sciences Building, 155 College Street

June 9, 2010

Sampling strategies, analytical methods and interpretation strategies for microbiological investigations in buildings

Gage Research Building, 223 College Street

June 16, 2010

Recurrent Event and Multistate Models

Health Sciences Building, 155 College Street

June 15 and 17, 2010

Applied Bayesian Analysis

Health Sciences Building, 155 College Street

June 22 and 24, 2010

Graphical Modeling for Data Analysis

Health Sciences Building, 155 College Street

June 29, 2010

Comparative Politics of Health and Health Policy in a Globalizing World

Health Sciences Building, 155 College Street

July 12, 14, and 16, 2010

An Introduction to Measurement, Questionnaire Design and Mail Survey Implementation

Health Sciences Building, 155 College Street

July 20, 2010

Mixed Models Workshop

Health Sciences Building, 155 College Street

August 3 and 5, 2010
